Sales Performance Dashboard

Power BI Capstone Project

Data-driven insights across brands, colors, regions, and customer segments to support strategic business decisions.

Key Metrics

3M	Total Sales
932K	Total Profit
31%	Profit Margin
5.2K	Customers

Analyst: Faith Olayiwola | Tool: Excel, Power BI , PowerPoint Presentation| Period: Q1 2024

Dashboard Overview — Key Performance Indicators

₦3M

Total Sales

Gross revenue Q1

₦2M

Total COGS

Cost of goods sold

₦932K

Total Profit

Net profitability

5,200

Total Customers

Active customer base

Dashboard Insight

The company generated ₦3 million in sales, delivering ₦932K in profit. This indicates a healthy but optimizable margin structure of approximately 31%. With a customer base of 5,200, the revenue-per-customer ratio reflects strong market penetration. Cost control appears moderately efficient, leaving meaningful room for margin improvement through targeted optimization.

31%

Profit Margin

Profit by Brand

Identifying top-performing brands and their contribution to overall profitability

Insight: Profit is unevenly distributed across brands — top performers (Apple, Dell) drive a disproportionate share of total profit.

Revenue by Product Color

Black

₦3M

33.33% of Total

Gray

₦3M

33.33% of Total

White

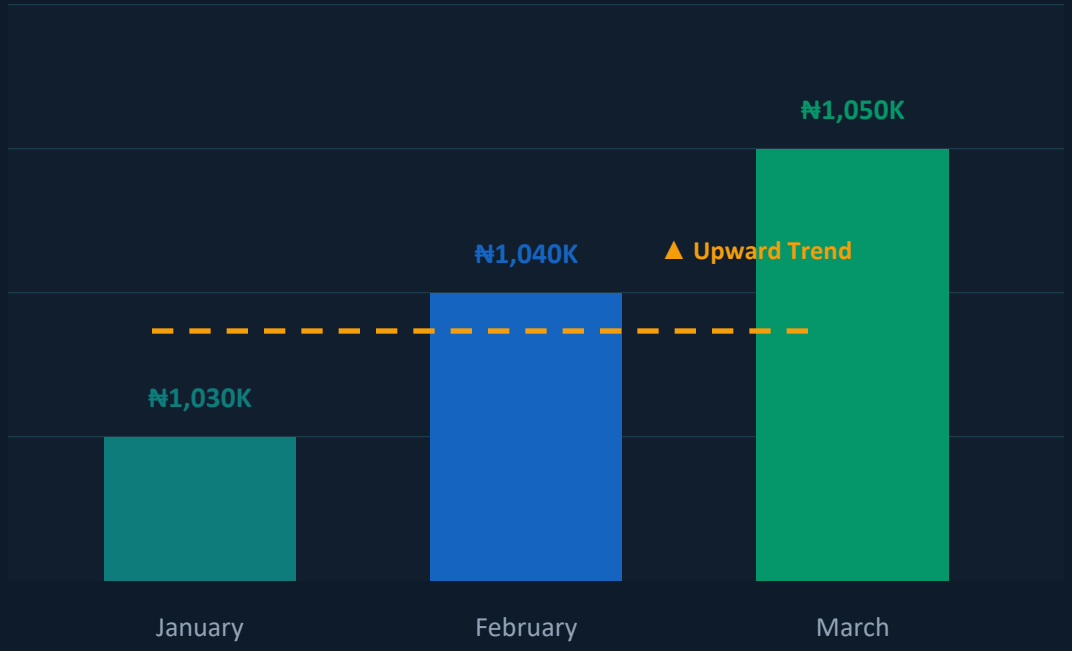
₦3M

33.33% of Total

Insight: Revenue is perfectly balanced across all three product colors (33.33% each), indicating no consumer preference dominance. This signals strong product-market fit, consistent demand across variants, and eliminates the need for inventory bias toward any single color.

Revenue by Month — Q1 Trend

Tracking sales momentum across January, February, and March



Trend Analysis

+₦10K	Jan → Feb growth
+₦10K	Feb → Mar growth
+₦20K	Total Q1 uplift

Revenue demonstrates steady upward momentum across Q1, likely driven by marketing impact or seasonal demand patterns.

Insight: Positive Q1 momentum — revenue grew steadily each month, suggesting improving sales performance and potential for strong Q2 results.

Income Level by Profit

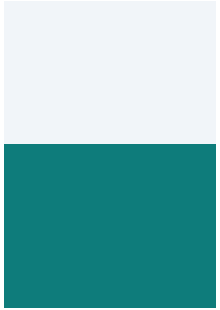
HIGH

~₦500K+

~54% of Total Profit

Premium customers driving majority profit. Target with loyalty & upsell strategies.

MEDIUM

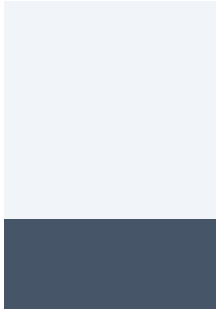


~₦280K

~30% of Total Profit

Steady mid-market contributors. Growth potential through targeted offers.

LOW



~₦150K

~16% of Total Profit

Smaller but stable base. Consider value-tier products to drive volume.

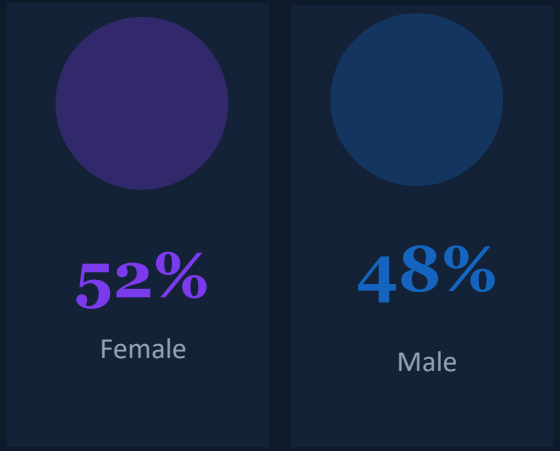
Insight: High-income customers contribute disproportionately (~54%) to total profit, confirming premium market strength and upselling opportunity.

Regional & Gender Segmentation

Interactive filters enabling targeted strategy by region and customer gender

Regional Analysis

Gender Breakdown



Strategic Application of Segmentation:

Regional filters identify the East as the strongest market, enabling targeted investment. Gender data supports personalized marketing campaigns — slight female majority (52%) can inform product messaging, packaging, and promotional strategy.

Key Business Insights

01 Strong Overall Profitability

A 31% profit margin (₦932K on ₦3M revenue) reflects a healthy business foundation with clear room for further margin optimization.

02 Brand Concentration Risk

Profit distribution is uneven across brands. Top-performing brands (Apple, Dell) drive a disproportionate share, creating both strength and concentration risk.

03 Balanced Color Revenue

Perfect revenue parity across Black, Gray, and White (33.33% each) signals consistent product-market fit and eliminates inventory bias needs.

04 Positive Q1 Revenue Momentum

A steady monthly upward trend across Q1 (Jan → Mar) indicates improving sales performance and signals favorable Q2 outlook.

05 High-Income Segment Dominance

High-income customers generate ~54% of total profit, confirming the strategic importance of premium segment targeting and upselling.

06 Solid Customer Base

5,200 active customers provide a stable revenue foundation — average revenue per customer supports consistent ROI across marketing investments.

Business Recommendations

Strategic actions to sustain growth, optimize margins, and expand market reach

Prioritize Top Brand Marketing

Focus marketing investment on Apple and Dell, which drive the highest profit contribution. Explore premium positioning and exclusive promotions.

Develop Premium Offers for High-Income Customers

Build upsell pathways and loyalty programmes for high-income customers who generate ~54% of total profit.

Maintain Balanced Color Inventory

Since all three colors perform equally, maintain even inventory allocation. Avoid over-investing in any single color variant.

Investigate Cost Optimization

Current COGS at ₦2M against ₦3M revenue leaves a 31% margin. Supply chain review and vendor negotiation could push margin above 35%.

Expand in Highest-Performing Region

Channel increased resources into the East region which leads in revenue. Apply learnings to uplift performance in the West.

Technical Skills Demonstrated

Data Modeling

Structured relational data model in Power BI with defined table relationships and optimized schema.

DAX Calculations

Custom DAX measures: Total Sales, Total COGS, Total Profit, Profit Margin %, Customer Count.

KPI Cards

Dynamic KPI cards displaying real-time metrics — Sales, COGS, Profit, Customers — responsive to filters.

Interactive Slicers

Region (East/North/South/West) and Gender (Male/Female) slicers enabling dynamic dashboard segmentation.

Comparative Charts

Horizontal bar charts for brand profit comparison; donut chart for color revenue distribution by percentage.

Dashboard UX Design

Cohesive layout design with consistent color coding, clear visual hierarchy, and intuitive slicer placement.

POWER BI

Sales Performance Dashboard

Capstone Project — Summary

This dashboard delivers end-to-end visibility into brand profitability, color revenue distribution, customer segmentation, and Q1 sales trends — enabling data-driven decisions across marketing, supply chain, and customer strategy.
